

The difference is night and day

Equinox - tiled roof system

Welcome to A comfortable year-round living space

Discover the contemporary way to enjoy your conservatory – every day

Traditional conservatories can uplift and enhance any home. Yet despite the extra light and space they provide, they can be subject to the elements, becoming too hot in the summer and too cold in the winter. Now, thanks to the new Equinox tiled roof system, you can transform your conservatory from an under utilised space, into a cosy, welcoming extension to your home that provides the same levels of comfort - 365 days of the year, 24 hours a day.

Equinox is a fully insulated tiled roof system, for simple retro-fitting to existing conservatories or flat-roof structures. It's the ideal replacement for ageing glass or polycarbonate roofs – or as an alternative roof for brand new conservatories and traditional extensions.

Energy-saving design for optimum comfort

Equinox has insulation panels integrated within the structure, achieving an incredibly low U-value of 0.15. Such superior energy efficiency means no more extremes of temperature inside the living space, making it a comfortable room in all weathers and saving you money on heating bills.

Less weather noise for peace and tranquility

Equinox allows you to enjoy your conservatory – regardless of the elements and whatever the temperature outside. Its solid, tile or slate roof means that weather noise is also reduced, but visibility isn't. So even if it's windy and raining outside – you can still relax in the sanctuary of your conservatory!

Attractive styling – inside and out

Roofs can be fitted with premium slate-style tiles or standard steel tiles in a range of colours to complement any home. The internal surface of the roof can be finished with a modern plasterboard or tongue and groove timber ceiling, creating the look and feel of a conventional home extension.

No compromise on light

The Equinox system can be fitted with additional roof windows that will continue to flood your conservatory with natural light. This gives you a bright and airy environment, but removes the harsh summer glare of traditional conservatories.

Suitable for all types of conservatories

Choice of fascias and soffits

Equinox is supplied with fascias, soffits and guttering in a choice of colours. Fascias and soffits are available in White, Golden Oak or Rosewood.
